Peter

These look more or less as expected - the case figures match the information from the hospital certificate book counterfoils.

Gloria

How many deaths did we find for her in 1999, 2000 and 2001?

How do the deaths in 2000 split between Jan-June, July and August-December?

Peter

She stopped working at the hospital in July 2000 - but continues in general practice.

It would be good to include key dates in the analysis (e.g. when she stopped working in the hospital)

Interesting - she will not have worked at the Hospital in 2002, and may have adopted a policy of not signing certs in general practice (if any were needed); this finding could therefore be reassuring. However, a sight of all the data from 1993 would be helpful before drawing a firm conclusion.

We didn't find any - does that make any sense?

Thanks - does this mean there were no Dr Barton deaths in 2002, or that your team has not gone through these yet?

We are about halfway through the other years (which include lots of Dr Bartons). Should all be done later this week/early next.

Peter
