Subject: URGENT: DRAFT HPT Response to CHI recommendations - GWMH deaths

Importance: High

Further to last week's exchanges, I attach my latest draft of HPT's responses to the CHI 2002 Action Plan (the excel document). I am grateful to Ruth Lord, Ross Mitchell, Martin Le Good and Sarah Garland for their input into this document and would ask that all contributors and those who will be responsible for signing this off (Pat) consider the attached and let me have a note of any amendments they wish to see.

I have arranged with Debbie Sloan for this document to be considered by the Clinical Governance and Risk Committee on 14 Jan (deadline for papers is 7th Jan). However, my understanding is that it needs to be with the Health Authority by the 5th January so Pat will need to sign it off ahead of CG&RC consideration. May I therefore ask you all to give this your urgent consideration.

I am working on a covering paper for CG&RC so the attached (word document) is a very initial draft.

I bring to Pat's attention a couple of areas where issues have already been identified, namely in recommendation numbers 8 and 10.

Ross/ Martin: you will see against recommendation number 6 there is a request for comments about training / CPD received by doctors. The draft referred to Rosie to provide; I'm sorry I don't know who that refers to
- Dr Lusznat???? If so, could Martin Le Good please ensure the words are added and with me by 9am on 5th Jan as I shall not be in the office in the interim.

Kind regards

Watson Catherine

Subject: RE: URGENT: FINAL HPT Response to CHI recommendations - GWMH deaths

Catherine

Thanks there is an error in the return in that we do use GPs to provide some on call cover for medical not psychiatric issues. I can find no evidence to support the fact that any of the predecessor organisations f&g/Eh provided this for the mental Health wards. However we do have established links to GP practices by CPN and have over the last years proactively worked on engagement and every GP surgery has been visited by the consultant and cpn for that patch.

Sarah Garland the new Modern Matron has developed a comprehensive action plan (based on the existing ward development plan) to address outstanding CHI issues and other emergent themes.

Please also be advised that we have a POVA meeting scheduled for January for Daedalus ward as a result of one of our ongoing investigations.

Regards

Martin

Further to yesterday's email, please find attached FINAL version of HPT's response to the 2002 CHI Action Plan. Pat is happy to sign this off today and send to Mary Deeks and/or SHA. It will be considered at HPT's CG&RC on 14 Jan 09 when I propose that future monitoring arrangements are agreed - possibly with a report back to CG&RC at their next meeting in Feb.

Martin Robinson/Martin Le Good: please note that recs 8 and 10 now require action by OPMH Clinical Governance Group.
