Your Ref:

Dear Ian

Re; Copies of Notes – **Code A** deceased

In May we were trying to contact Dr Khwaja to agree release of **Code A** health records to his son **Code A**. At the time, following discussion with Althea you suggested we keep a copy in reserve and if we had no response from Dr Khwaja you would sanction their release.

Unfortunately, there has been considerable time delay, with no response from Dr Khwaja. To add to the problem we were under the mistaken belief that these records were in fact not in our possession but being held in secure MOD storage.

They came to light last week and due to the time delay a PCT decision was taken to release the records. **Code A** is now in receipt of the documentation relating to his late Father's admission to GWMH.

To complete our copy record would you please be kind enough to sign the Consultant declaration?

Thank you for your assistance.

Yours sincerely

Code A
